

Notify Jazz of New/Unusual Ship-to's.

As a Jazz customer, you may wish to have Jazz export-ship your finished wafers to foreign test houses, packaging houses, foreign locations of your company or to your customers.

In addition to needing a customer-selected ECCN, **Jazz must also clear all Ship-to's against U.S. Government export control lists**, where the customer generally designates a particular Ship-to for a given wafer shipment, taken from a small group of Ship-to's used by that customer.

It is therefore **imperative that the customer notify Jazz in advance of any new and rarely-used Ship-to's (which are likely to need clearance)**, so that Jazz is enabled to make shipments without delay.

If you have any questions, please contact Jazz's Import/Export Administrator, Eric Van Gilder, at (949) 435-8365 or eric.vangilder@jazzsemi.com
